

## **ABSTRACT OF THE DISCLOSURE**

A dust container having a handle which self recovers and a vacuum cleaner having the same, to thereby conveniently pull the dust container from a cleaner body.

- 5 The dust container includes a container body and a handle pivotably disposed at the dust container. A guide incline slidably contacts with and resiliently deforms the handle in a pivotal axis direction while the handle pivots. A fixing rib is disposed at the guide incline to restrain a pivoting angle of the handle.
